RURAL AND INDUSTRIAL ELECTRIFICATION CONTINUES

ESTONIAN POWER CAPACITY INCREASES -- Sovetskaya Estoniya, No 10, 13 Jan 49

Construction has begun on the second unit of the Saur'ya GES on the Yagala River in Khar'yu Uyezd. An installation with a 100-kilowatt generator has been added to the first unit, which has a capacity of 30 kilowatts.

Sovetskaya Estoniya. No 11. 14 Jan 49

A heavy-duty turbogenerator was put into operation at the Kokhtla-Yarve TEs on 13 January. Primarily, the new TEs will furnish the shale gas plant with electricity. It will also supply electricity to the many enterprises, mines, cities, and villages of the shale basin.

Sovetskaya Latvija, No 100, 29 Apr 49

A power plant has been built on Vormsi Island of the Estonian SSR. Electricity was installed in the school, the hospital, and in the homes of kolkhoz farmers and fishermen.

There are now more than 280 power plants in uyezd cities, volost's, and on numerous islands of the Republic.

5,500 UKRAINIAN ELECTRIFIED KOLKHOSES -- Leningradskaya Pravda, No 108,
10 May 49

The number of kolkhozes in the Ukraine now having electricity is 3,500.

There are now about 150 GESs under construction in the Ukraine, of which 14 are interkolhoz GESs.
